

News Letter N°3

April 2017

Partners meetings and developments

Partners met in Valencia (Spain) last 20 and 21st October 2016 and in Lyon (France) 2nd and 3rd of March 2017 and worked on:

- Validation of certification reference energy performance building professionals (RC)
- Validation of professional activities and competencies reference of energy performance building professionals (RAP)
- State of resources in each country, Moodle upload, translations into English and other languages, materials and scenarios for the production of multimedia resources
- Presentation in each country of the training and feedback of these courses.
- Brochures and CD to disseminate the project and its contents.
- Presentation of TEPEB assistant.

Partners

France

Public Interest Group - Professional Training and Insertion of the Academy of Grenoble (GIP-FIPAG).

Project leader

Recognized training center, GRETA is an engine for development and implementation of the project with partners in the building sector affected by the energy transition.

Schneider Electric France Energy training

Industrial and key player in continuing training France. It has a significant experience and knowledge in energy efficiency and deployment of solutions for the building sector.

Promotes and supports building companies in the development and deployment of solutions in the field of energy performance.

Promotes with public authorities the interests of industrial and professional renewable energy. Creator of a commission "Renewable energy and building" that transmits its expertise in financing, technology watch and contact network.

Spain

The Architecture Department of Construction and Engineering

offers: buildings thermal behavior analysis. Proposals to improve energy efficiency with insulation techniques and Holes and sensitive points in buildings that can generate leaks and air tightness losses.

At the pictures, some moments of those meetings. Valencia meeting

Professional organization and training center. The implementation of the project is based on its technical expertise in training and consulting in sustainable development applied to the building sector

Engineer company will give to the project its experience in the areas of water treatment, quality of indoor air, renewable energy and energy efficiency.

Lyon meeting

Next transnational meeting will be held in Sofia (Bulgaria) next 4th and 5th May 2017.

Training

Partners have tested the modular training with 150 participants in the three countries.

At the pictures some moments of the training in Turkey. Training on Module 1 in the fifth level in Turkey started on 18 February 2017. Fifteen people wishing to participate in Module-1 training were informed on 22 February 2017 by lecturer Mr Ersin Şahin at İstanbul Beykoz University. After giving general information about the project in the seminar, the usage of the moodle system was shown and a discussion was held afterwards.

Turkey

Private non-profit foundation university in İstanbul (Turkey). Beykoz University was founded as the successor of Beykoz vocational school of logistics.

TTE provides the project with its knowledge and experience in the design and implementation of projects using renewable energy.

Teknikerler Birliği, Technicians Association in Turkey

Bulgaria

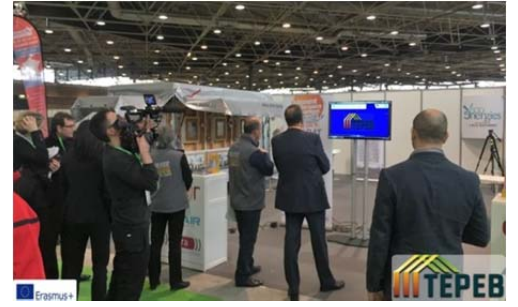

External evaluator partner

Training on Module 1 in the fifth level in Turkey started on 18 February 2017. Fifteen people wishing to participate in Module-1 training were informed on 22 February 2017 by lecturer Ersin Şahin at İstanbul Beykoz University. After giving general information about the project in the seminar, the usage of the moodle system was shown and a discussion was held afterwards.

Dissemination

GRETA académie de Grenoble and the Cluster EcoEnergie present TEPEB project at Salon Be Positive Eurexpo Lyon last 8th and 10th March 2017. This trade brings more than 500 exhibitors around solutions for energy and environmental performance. This year, the show has received more than 28,000 visitors

Turkish partners were at WIN METAL WORKING fair held in TÜYAP, İstanbul on 9-12 February 2017 in order to introduce the TEPEB project to a wider audience. Lecturer Ersin Şahin from Beykoz University and Prof. Dr. Caner Aküner from Marmara University represented the TEPEB project in the WIN METAL WORKING.

On 23 February 2017, a national meeting was held at the Beykoz University in İstanbul with the participation of representatives from the energy sectors, the national project partners of the Technicians' Union and the TEPEB project auditor. Firstly, a presentation was presented by lecturer Ersin Şahin at the meeting, on the TEPEB project.

After that, consultations were held with representatives from the energy sector on the progress of the TEPEB project and the applicability of the project in Turkey.
